SUMMARY

Technical Product Manager with 3+ years of experience delivering scalable platform products supporting mission-critical financial systems processing 250K-300K daily transactions. Experienced translating complex business needs into product requirements, prioritizing roadmap initiatives, and partnering with engineering, operations, and business stakeholders to deliver secure, customer-centric solutions at enterprise scale. Strong background in data-driven decision making, SQL, Python, KPI development, and platform analytics to improve operational efficiency, system reliability, and user experience. MBA in Finance and Supply Chain with expertise in product strategy, cross-functional leadership, and end-to-end product execution.

EXPERIENCE

JP MORGAN CHASE & CO.

Bengaluru, India

Software Engineer II

2023 - 2024

- Led end-to-end delivery of platform capabilities supporting FX and derivatives systems processing 250K–300K daily transactions, translating business requirements into scalable product solutions that improved operational efficiency and platform reliability.
- Partnered with product managers, engineering, operations, and business stakeholders to define product requirements, prioritize feature enhancements, and align roadmap execution with customer and operational needs.
- Owned product delivery for backend platform services supporting \$10B–\$15B in daily settlement value, balancing scalability, reliability, security, and performance across distributed financial systems.
- Built a real-time operational intelligence platform aggregating logs, metrics, and telemetry across 20+ microservices, reducing incident resolution time by 40% while improving platform visibility and customer support.
- Leveraged SQL and Python to analyze operational data, identify product improvement opportunities, define success metrics, and support data-driven prioritization of engineering initiatives.
- Developed self-service dashboards and platform KPIs enabling engineering and operations teams to monitor application health, measure product performance, and proactively improve customer experience.

Software Engineer I

2021-2023

- Delivered platform enhancements for enterprise FX settlement products by collaborating with engineering, operations, and business teams throughout the product lifecycle, from requirements gathering through production deployment.
- Designed and launched the Can I Trade pre-payment confirmation capability supporting \$200M–\$2B in daily transactions, improving workflow automation and reducing operational risk.
- Drove modernization of Brokerage FX workflows by integrating legacy platforms with event-driven microservices, improving scalability, transaction visibility, and platform adoption.
- Improved FX Options settlement automation to 95% straight-through processing, reducing manual intervention while enhancing operational efficiency and customer experience.
- Optimized Kafka and IBM MQ messaging infrastructure through data-driven performance analysis, increasing platform stability, improving throughput, and reducing production support effort.
- Collaborated cross-functionally to define functional requirements, validate technical solutions, manage release execution, and ensure successful delivery of customer-focused platform enhancements.

Award: J.P. Morgan Impact Award (2022) for system modernization and engineering excellence

SKILLS

Product Strategy | Product Roadmap | Product Lifecycle Management | Product Requirements | Product Prioritization | Product Delivery | Stakeholder Management | Cross-Functional Leadership | Agile (Scrum) | SQL | Python | Data Analytics | KPI Development | Customer Insights | Roadmap Planning | A/B Testing | API Strategy | Platform Products | Jira | Data Visualization

EDUCATION

RUTGERS, THE STATE UNIVERSITY OF NEW JERSEY

Newark, NJ

Rutgers Business School

May 2026

Master of Business Administration - Finance and Supply Chain Management

- Dean's Excellence Award
- Secretary, RBS MBA Finance Club

VELLORE INSTITUTE OF TECHNOLOGY

Chennai, India

Bachelor of Technology - Computer Science

May 2021
